

# TALENT AT CREDON.

## MEET STIJN VAN EVEN

### STIJN THE ESSENTIALS TEAM CREDON SINCE 2016

#### WHAT DID YOU WANT TO BE AS A CHILD?

I was always fascinated by archeology and history, so my first big dream was to become an archeologist. Look at me now, the universe had other plans for me in store!

#### BEST MEMORY @ CREDON?

Definitely my internship, Credon has the amazing ability to make you feel at home in an instant. (I know I can only pick one, but all our awesome parties, kickoffs, Christmases, events, ... every one of them is memorable!)

#### DESCRIBE YOUR JOB IN 7 WORDS OR LESS?

Inspiring people with actionable analytics and insights.

#### WHY BI?

With BI you can clearly see the added value you deliver to your customers. I love to work with data, not only the deep technical stuff, but also delivering useful insights to every employee in a company.

#### WHAT MAKES CREDON AWESOME FOR YOU?

The feeling of being part of a family and the appreciation you get from everyone. I couldn't have wished for a better team to work with!

#### STIJN'S INTERNSHIP

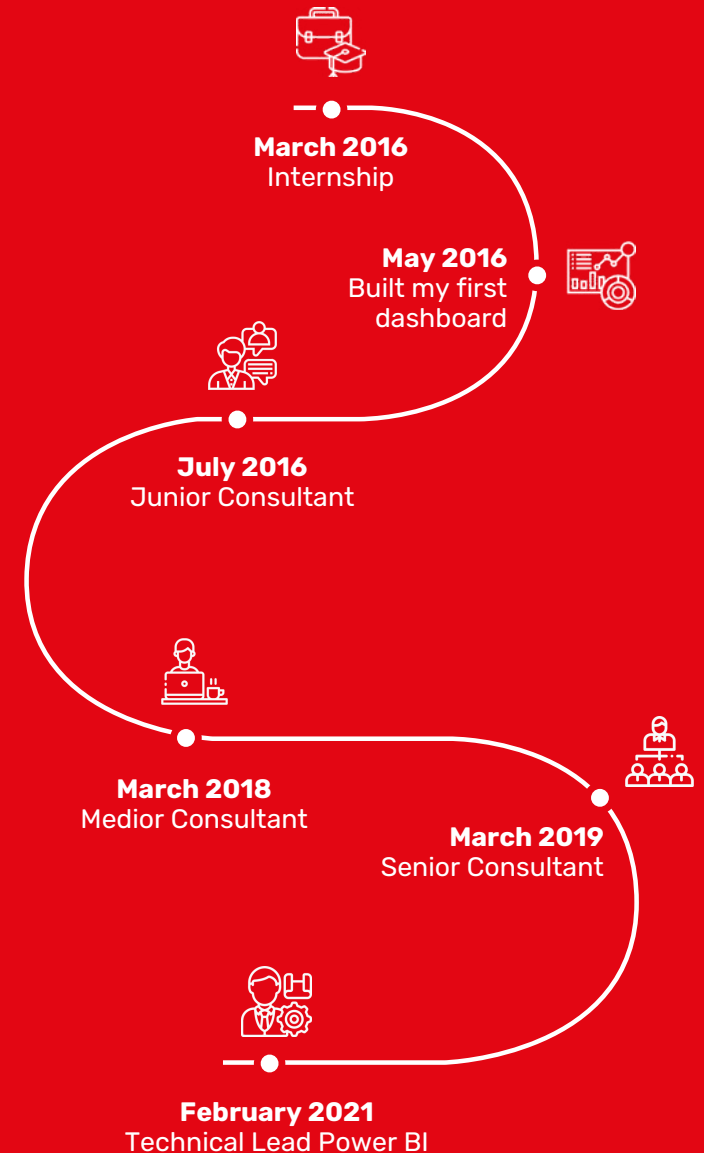

During my internship for Daikin at Credon in 2016, I had a first real-life experience in how a customer project is tackled from A to Z in all its aspects. From intake meetings to all communications, to application development, support, and delivery. In these processes, I could always count on the other Credon consultants that were at my side for guidance and support.

During my internship, I built an application that allowed the Daikin research and development department to analyze the output of every air-conditioning unit, in development, vis-à-vis already installed units.

After my internship, I was given the opportunity to continue as the principal consultant for Daikin. That's where I really developed my passion for data.

## STIJN'S JOURNEY

After successfully finishing his internship, Stijn continued his journey at Credon. And look how far he has made it today!

Ready to start your journey at Credon?  
Don't hesitate just apply for an internship  
or job post! We are ready for you!
